

narrow: $n=2$ qubits, $L=2$ layers (16 quantum parameters)
 one variational layer drawn; it is applied 2× between AngleEmbedding and measurement

baseline: $n=4$ qubits, $L=2$ layers (32 quantum parameters)
 one variational layer drawn; it is applied 2× between AngleEmbedding and measurement

wide: $n=6$ qubits, $L=2$ layers (48 quantum parameters)
 one variational layer drawn; it is applied 2× between AngleEmbedding and measurement

deep: $n=4$ qubits, $L=4$ layers (64 quantum parameters)
 one variational layer drawn; it is applied 4× between AngleEmbedding and measurement
